

I firmly believe there is value in national services. The radio station I listen to is 88.9 K-LOVE. As a listener I enjoy being a part of a larger body of listeners nation-wide. I need a boost in my day and K-LOVE provides this with positive and encouraging music. There is one other station that sometimes picks up in my area, but it is located in another area code and the signal does not come in most of the time. The national broadcast provides a clear signal and a wide range of listeners. Instead of hearing only local news, I am able to hear what is going on in other communities. If LPFM were put in place, my community would not be guaranteed the positive, encouraging music K-LOVE provides. Thank you.
